Annual Indexes

Volume 7—October 1977 to July 1978

1. Subject Index

A

Additional discussion of previously published paper 259
American National Standard practice for roadway lighting 16
Arc voltage control in low and high pressure sodium lamps 125
Atmospheric light pollution 105
Automatic floodlight aiming optimization 223
Axial species densities in 175-watt sodium-scandium metal halide lamps. 118

C

Coefficient of utilization, Extending the 207
Color rendering fluorescent light sources, An examination of visual clarity with high 74
Committee Reports
- American National Standard practice for roadway lighting 16
- IES approved method for photometric testing of roadway luminaires ... 132
- IES guide to lamp seasoning 144

Contrast in visual tasks using a visual and physical photometer, Studies of loss of 161

D

Diffuse and specular components of reflectance: why and how 240
Discomfort glare: concentrated sources—parametric study of angularly small sources 2
Discussion of previously published paper 63
Discussion of previously published paper, Additional 259

E

Energy saving fluorescent lamps, Real 154
Equivalent sphere illumination, An instrument for the measurement of .. 183
Equivalent sphere illumination, On .. 177
Errors of the standard photometric system when measuring the brightness of general illumination light sources 55

F

Floodlight aiming optimization, Automatic 223
Fluorescent light sources, An examination of visual clarity with high color rendering 74

G

Glare: concentrated sources—parametric study of angularly small sources, Discomfort 2
Glass, Visibility distance through heat absorbing 168

H

Heat absorbing glass, Visibility distance through 168
High pressure sodium lamps, Arc voltage control in low and 125
High mast lighting equipment, Complexities and interrelationships in lowering device design for 212

I

IERI Reports
- Discomfort glare: concentrated sources—parametric study of angularly small sources 2
- Is there an optimum light level for office tasks? 255
- Studies of loss of contrast in visual tasks using a visual and physical photometer 161

IES approved method for photometric testing of roadway luminaires 132
IES guide to lamp seasoning 144
Illumination, Streetlighting luminaire distributions for uniform luminance and 190
Incandescent lamps, Thermochemical relationships for phosphorous getters in gas-filled 202

L

Lamp seasoning, IES guide to 144
Lamp spectra, Optimum 66
Light level for office tasks?, Is there an optimum 255
Light pollution, Atmospheric 105
Light sources, An examination of visual clarity with high color rendering fluorescent 74
Light sources, Errors of the standard photometric system when measuring the brightness of general illumination 55
Low and high pressure sodium lamps, Arc voltage control in 125
Lowering device design for high mast lighting equipment, Complexities and interrelationships in 212
Luminaires, IES approved method for photometric testing of roadway 132
Luminance and illumination, Streetlighting luminaire distribution for uniform 190

M

Measurement of equivalent sphere illumination, An instrument for the 183
Measurements, A photometer for reflex-reflector performance 147
Measuring the brightness of general illumination light sources, Errors of the standard photometric system when 55
Mercury vapor lamp sockets, 300-watt metal halide lamp for use in 400-watt 234
Metal halide lamp for use in 400-watt mercury vapor lamp sockets, 300-watt 234
Metal halide lamps, Axial species densities in 175-watt sodium-scandium 118
Metal halide lamps, Photometric characteristics of 197

O

Office tasks?, Is there an optimum light level for 255
Optimization, Automatic floodlight aiming 223
Optimum lamp spectra 66

P

Phosphorous getters in gas-filled incandescent lamps, Thermochemical relationships for 202
Photometer for reflex-reflector performance measurements, A 147
Photometer, Studies of loss of contrast in visual tasks using a visual and physical 161
Photometric characteristics of metal halide lamps 197
Photometric system when measuring the brightness of general illumination light sources, Errors of the standard 55
Photometric testing of roadway luminaires, IES approved method for .. 132

R

Reflectance: why and how, Diffuse and specular components of 240
Reflex-reflector performance measurements, A photometer for 147
Roadway lighting, American National Standard practice for 16
Roadway luminaires, IES approved method for photometric testing of 132

S

Scandium-sodium iodide arc lamp, Semi-empirical model for the electrical conductivity of the 249
Seasoning, IES guide to lamp 144
Sodium lamps, Arc voltage control in low and high pressure 125
Sodium-scandium metal halide lamps, Axial species densities in 175-watt 118
Sources, Discomfort glare: concentrated sources—parametric study of angularly small 2
Spectra, Optimum lamp 66
Specular components of reflectance: why and how, Diffuse and 240
Streetlighting luminaire distributions for uniform luminance and illumination 190

T

Tasks?, Is there an optimum light level for office 255
Tasks using a visual and physical photometer, Studies of loss of contrast in visual 161
Thermochemical relationships for phosphorous getters in gas-filled incandescent lamps 202
Traffic accidents, The relationship between visibility and 95

U

Utilization, Extending the coefficient of 207

V

Visibility and traffic accidents, The relationship between 95
Visibility distance through heat absorbing glass 168
Visual clarity?, What is 85
Visual clarity with high color rendering fluorescent light sources, An examination of 74

Visual tasks using a visual and physical photometer, Studies of loss of contrast in 161
